(54) Title: AUTHENTICATION SYSTEM FOR CONNECTING CLIENT TO SERVER PROVIDING PARTICULAR INFORMATION USING DEDICATED SYSTEM AND METHOD THEREFOR

(57) Abstract: An authentication system and method therefor is provided, in which a dedicated system is installed to allow only a computer system which is monopolistically and exclusively supplied by a company operating an information providing server to be used to access the server. Here, user computer includes an authentication system which generates a specific registration code of the system. The authentication system includes user computer for generating a registration code for authenticating the user computer; and a system server which receives the registration code of the user computer and ascertains whether or not the user computer is registered.
